EXPERIENCE —

UI/UX Designer, Software Composer

UN-Habitat's Quality of Life Initiative

July 2024 – Nov 2025

Shipped a **global quality-of-life platform** used across **80+ cities**, designing **accessible** (WCAG 2.1) data visualizations, enterprise CMS experiences, and high-fidelity prototypes from **concept to launch**. Built a **200+ component design system** and translated complex multi-source datasets into intuitive user flows, visualizations, and iconography, improving **consistency** across the platform.

Increased design and development velocity by **50%** through rapid iteration cycles, reusable components, and **scalable** design patterns. Leveraged **Cursor and Windsurf AI** to accelerate **front-end prototyping** and CMS implementation, partnering with engineers to **design an AI-powered chatbot** for city administrators.

Collaborated with a cross-functional team of 10 and validated solutions with **25+ city officials** and **global stakeholders** to ensure usability and adoption.

Project Manager

Quality of Life Initiative Hackathon Program

June 2025 – Nov 2025

Led the University of Waterloo hackathon for **80+ participants**, creating a global framework that was later replicated in China and expanded to Ghana, growing the initiative to **300+ total participants** across three events.

Directed end-to-end event logistics for the flagship UW event, managing a team of **10 volunteers** and **5 judges** across marketing, participant experience, and day-of execution.

Deployed registration sites, surveys for all three events, **coordinating remotely** with the **China and Ghana teams** to maintain consistency as the framework scaled. Managed multiple concurrent workstreams as the framework **expanded internationally**.

Lead UX/UI Designer

Tako Inc. Startup @ Velocity

April 2023 – August 2023

Shipped an **all-in-one B2B logistics platform** connecting exporters, importers, and restaurants for fresh fish trade between **Canada and Japan**, taking the product from concept to launch in **4 months**.

Researched complex **B2B supply chain** processes and data systems to guide product direction, translating fragmented workflows into a **unified design strategy**. Delivered **responsive** design systems, prototypes, and UI components that boosted user engagement by **40%**. **Accelerated MVP** development by **30%** through rapid iteration and close cross-team collaboration with engineering.

Designing tools that make ʘ

♪ difficult things easy.

EDUCATION

University of Waterloo

Honours Global Business and Digital Arts

3.8 GPA, Term Distinction 2024

CERTIFICATES

W3C Intro to Web Accessibility 2024

Motion Design with Figma 2023

Google UX Design Certificate 2022

TCPS 2 in Research Ethics 2022

AWARDS

Best UI, Runner-up, UXL Designathon | 2024

Honorable Mention, Sun Life uXperience Design Jam | 2024

SKILLS

Tools

Figma · Framer · Adobe CC · Cursor AI · HTML/CSS · React/Next.js

Design & Prototyping

Interaction design · Wireframing & prototyping · High-fidelity mock-ups · User flows · Design systems · Responsive design · Information architecture · Accessibility (WCAG) · O-to-1 product design · AI-assisted prototyping

Research & Analysis

User research · Usability testing · A/B testing · Journey mapping · Data-driven design

Collaboration & Leadership

Cross-functional collaboration · Stakeholder communication · Design critiques · Agile/Scrum · User-centered · Detail-oriented · Self-starter · Fast-paced environments
